

Our solution for the online cutting and re-feed of winnowers to improve your tobacco yield

PRODUCT RECOVERY

Winnower recovery WinU⁺

Yield improvement is one of the key issues for cigarette manufacturers. Every cut filler contains winnowers that can not be processed in the cigarette and are usually disposed of or returned to primary (PMD). Our WinU+ technology is designed to separate, cut and re-feed the blend specific winnowers online to the cigarette maker - fully automatically. The winnowers structure and particle size is adjustable according to the respective tobacco.

ADVANTAGES FOR YOU

- Blend-specific winnowers recovery
- Automatic and online re-feed to cigarette maker
- Higher tobacco yield
- Easy and fast integration
- Flexible location
- Short payback period

FEATURES

- Stand-alone unit on wheels next to cigarette maker
- Compatible with all types of cigarette makers
- Adjustable dosing unit to re-feed
- SPS equipped with HMI
